1. After scanning “How to write a scientific article,” outline the typical sections of original research articles and technical reports. What does the acronym IMRAD stand for?
2. Work on your assigned glossary by adding new vocabulary from the texts. By the end of this week you should already have 105-150 terms.
3. Take the article “Computer assisted learning: a review.”
  - 3.1. Which conventions of scientific articles can you recognize in the text?
  - 3.2. According to the article, how did the introduction of the Internet affect CAL?
  - 3.3. In table format explain the differences between the computer’s teaching style and traditional education based on books and lectures. Take the information from the article.
4. Watch the video “The role of ICT in education” and then answer the questions:
  - 4.1. Do students like using computers at school? Quote testimonies from the video.
  - 4.2. Which benefits do teachers see in the use of ICT?
  - 4.3. They also have reservations about it. Why?
  - 4.4. In your opinion, how can we enjoy in class the advantages of ICT without its inconveniences?
5. The webpage “Introduction to computer assisted language learning (CALL)” lists different programs, activities and ways in which computers can be used in the language class. What is your experience with them? Which ones would you recommend as the most effective?
