UNIT 5	Agriculture	29 Feb. 2024
	APELLIDOS: NOMBRE: DNI / PASAPORTE: CORREO ELECTRÓNICO:	**Dating the past** **Library** HOJA: 1 /

"It is not that I'm so smart. But I stay with the questions much longer." Albert Einstein.

5.1. Watch the video "Why was agriculture so important?"

a) Explain the effects that the emergence of agriculture produced on humans and other species.

b) Speculate on the causes of that development, which occurred almost simultaneously in so many different regions.

c) What challenges does climate change pose today? What specific solutions can we adopt to respond to them?

5.2. Summarize the video "How does radiocarbon work?"

5.3. List and briefly describe the most important methodologies adopted by archaeologists for dating sites.

5.4. Watch the video "Should I be using Google or the library resources for a paper?"

a) What services do public libraries provide? And what are the main functions of a national library?

b) Explain what the Universal Decimal Classification is and how it works. List the nine main tables. Take a few examples of books from your library and analyse their UDC code.

c) What is Google Scholar? Comment on its main advantages and limitations.

5.5. By the end of this week your glossary should already have 175-250 terms.
