

# INGLÉS TÉCNICO

TOPIC 7	Software development	28 Oct. 2013
	APELLIDOS: NOMBRE: DNI / PASAPORTE: CORREO ELECTRÓNICO:	HOJA: 1 /

1. Take the article “Software process models.”
  - 1.1. The author complains that many process models are based on a “happy engineering world” that has little to do with the real world. Explain what he means.
  - 1.2. Outline the evolution of software process models (waterfall model, V model, and spiral model) with their advantages and disadvantages.
2. Work on your assigned glossary by adding new vocabulary from the text. By the end of this week you should already have 210-300 terms.
3. Read the tutorial on Gantt charts.
  - 3.1. What is a Gantt chart?
  - 3.2. Outline the steps that you need to follow in order to plan and schedule a team project.
  - 3.3. What do we mean by a project’s critical path?
4. Explain what open-source software is. Do you agree with Huw Collingbourne on “The problem with open-source software”?
5. Glance through the collection of cartoons on software development and programming. Do you think they reflect your own experience as a programmer? Which ones do you find the funniest? Why?
